**Caution**

- Do not look directly into the LED lights when lamp is operating.
- Do not direct light at other persons.
- Use only the supplied power adaptor.
- Do not hang, clip or tape any object to the lamp.
- Do not put this unit near any heat source, humid place or under direct sunlight.
- For indoor use only.

Please review these instructions before beginning the installation. Check that the correct components (shown below) were provided with your order. Do not discard the packaging until the product is assembled and functioning.

**Set-up**

1. Position the task light so that no obstructions prevent arm or lamp movement.
2. Insert the power supply jack into the lamp base.
3. Insert the power supply plug into an independent power outlet.
  - Do not share an outlet with high-power equipment such as printers, copy machines, scanners or computer work stations. This may cause the light to flicker.

**Operation****IRIS LED L**

1. Press and release the switch to turn the lamp on.
2. Press the switch the second time the light output will be reduced by 30%.
3. Press the switch one more time and the lamp will turn off.

IRIS LED L Light has automatic energy-saving mode, and the lamp will turn off after 12 hours of continuous work. To turn the lamp on, press the switch one time.

**IRIS LED LX USB**

1. IRIS LED LX features a continuous dimming option with memory. Press and release the switch to turn the lamp ON. Press and hold the switch to gradually increase to full brightness. Release the button when the desired brightness is reached.
2. Press and release the switch to turn the lamp OFF. When turned back ON, the light will illuminate at the previous intensity.
3. To decrease the intensity level, first increase it to full brightness. Then press and hold the switch to dim it to the desired level. The lamp must first be at its lowest intensity to increase the level again.
4. Aim the light by rotating the arm at the base and the lamp at the top of the arm.

IRIS LED LX has a USB port to charge smartphones, tablets, and other personal electronics.

IRIS LED LX Light has automatic energy-saving mode, and the lamp will turn off after 12 hours of continuous work. To turn the lamp on, just press the switch one time.
